SUMMARY:

Aspiring web developer pursuing a Masters in Computer Applications with expertise in Django, front-end technologies, database management, and Java. Passionate about building scalable web applications and collaborating with dynamic teams to solve real-world problems.

SKILLS:

- Python Django
- Java
- Php
- Git and Github
- HTML/CSS
- Backend Development
- Web Design
- Time Management

PROJECTS:

Storage Optimization for CCTV Footages

This project comprises both a desktop application and a web application. Its primary objective is to reduce storage usage of CCTV footage by removing redundant frames through image recognition and frame comparison

Technology Used :

- Python Django, REST ,OpenCV,TKinter,HTML ,CSS ,Bootstrap,JavaScript

Salon management

I During my undergraduate studies, I developed a Salon Management System project to streamline the operations and enhance the customer experience at a salon. This system allows salon coordinators to manage appointments, services, and real-time updates efficiently, while clients can seamlessly book services and view their appointments.

Technology Used :

- Php,MySQL,HTML ,CSS ,JavaScript

HospMate -Hospitality Management Platform

Our platform connects patients and families with bystanders and hospitals, allowing profile creation, service search, and appointment booking. Hospitals and bystanders manage profiles, availability, and services. Secure payments and a user-friendly interface ensure convenience and safety, addressing healthcare demands efficiently and effectively.

Technology Used :

- Python,Django,MySQL,HTML ,CSS ,JavaScript

EDUCATION:

Master of Computer Applications

Christ Deemed to be University -Present

Bachelor of Computer Application

MG University ,Kerala -2020-2023
