SUMMARY:

Aspiring web developer pursuing a degree in Computer Science with expertise in Django, front-end technologies, database management, and Java. Passionate about building scalable web applications and collaborating with dynamic teams to solve real-world problems.

SKILLS:

- Python Django
- Java
- Php
- Git and Github
- HTML/CSS

- Backend Development
- Web Design
- Time Management

PROJECTS:

Storage Optimization for CCTV Footages

This project comprises both a desktop application and a web application. Its primary objective is to reduce storage usage of CCTV footage by removing redundant frames through image recognition and frame comparison

Technology Used :

- Python Django, REST ,OpenCV,TKinter
- HTML ,CSS ,Bootstrap
- JavaScript

Salon managment

I During my undergraduate studies, I developed a Salon Management System project to streamline the operations and enhance the customer experience at a salon. This system allows salon coordinators to manage appointments, services, and real-time updates efficiently, while clients can seamlessly book services and view their appointments.

Technology Used :

- Php
- MySQL
- HTML ,CSS
- JavaScript
